Craig,

As you told me I believe Monday this case is extremely complicated. I believe that throughout the course of it we kept providing them with the discovery they have asked for. On the other hand our requests for information out of them have either gone unanswered or we have received incomplete information. Titus wants to bankrupt me. I switched to you based upon Michael Sklaroff's recommendation because you will not allow that to happen. They want me out of their flawed system which has ruined so many financially. I am more than happy to comply with the right settlement. Let's move towards that conclusion.

Glenn
